PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and M.Sc. Data Science & AI graduate with hands-on experience in Python, SQL, Power BI, and Excel. Proven ability to design end-to-end BI pipelines, perform EDA on large datasets (60K+ records), and deliver executive-ready dashboards. Skilled in predictive modeling, KPI tracking, data cleaning, and translating raw data into actionable business insights. Seeking an entry-level Data Analyst / BI Analyst role to drive data-driven decision-making.

TECHNICAL SKILLS

Languages	Python, SQL, MySQL
Libraries	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Statistics	Descriptive Statistics, Hypothesis Testing, Regression Analysis, Probability
BI & Visualization	Power BI (DAX, Power Query, Data Modeling, KPI Dashboards), Microsoft Excel (VLOOKUP, Pivot Tables)
Databases	MySQL, Relational DB Design, Joins, Subqueries, Window Functions, Stored Procedures
Data Analytics	Advanced Excel, KPI Reporting, Dashboard Design, Data Cleaning, Exploratory Data Analysis (EDA)
Tools	VS Code, Jupyter Notebook, GitHub, PowerPoint, MS Office Suite
Soft Skills	Analytical Thinking, Communication, Stakeholder Reporting, Problem Solving, Leadership

PROJECTS

Blinkit Business Intelligence Dashboard | Power BI | DAX | Data Modeling | SQL

- Built an end-to-end BI solution modeling operational logistics and sales performance of Blinkit (India's Last Minute App), transforming disparate relational datasets into a unified data model with star schema design.
- Developed an interactive, executive-ready Power BI dashboard aligned with Blinkit's corporate branding featuring KPIs for delivery SLA, order volume, revenue trends, and outlet performance across geographies.
- Leveraged DAX measures, Power Query transformations, and drill-through pages to enable real-time exploration of sales by category, city, and time period for stakeholder decision-making.

Healthcare Operations & Financial Analytics (60K Patients) | Python | MySQL | Power BI | Pandas | Seaborn

- Performed end-to-end analysis on a 60,000-patient healthcare dataset, handling missing values, outliers, and feature engineering using Python (Pandas, NumPy) to prepare data for modeling.
- Executed advanced MySQL queries (JOINS, window functions, aggregations) to derive KPIs around hospital efficiency, patient demographics, billing trends, and financial performance.
- Built an interactive Power BI dashboard tracking admission rates, length of stay, insurance distribution, and revenue metrics; generated EDA visualizations using Matplotlib and Seaborn.

Customer Shopping Behavior Analysis | Python | SQL | Power BI

- Analyzed 4,000+ customer records to uncover purchasing trends, seasonal patterns, and RFM-based customer segments using Pandas, Matplotlib, and Seaborn.
- Built an interactive Power BI dashboard with KPI cards and dynamic slicers enabling stakeholders to explore insights by segment, category, and time period.

HR Analytics Dashboard: Reducing Employee Attrition | Power BI | SQL | Excel

- Developed KPI cards, attrition trends, and drill-down visualizations to help stakeholders make data-driven workforce decisions.
- Analyzed employee demographics, job roles, salary bands, and satisfaction metrics using Power BI and SQL.
- Built an interactive HR Analytics dashboard to identify key factors driving employee attrition and support retention strategies.

INTERNSHIP

AI/ML & Data Expert – Virtual Internship | NDV TechSys Company

2 Months

- Executed data cleaning and preprocessing on real-world datasets: handled missing values, outliers, and feature engineering to prepare data for downstream analysis and ML modeling.
- Delivered 3+ end-to-end mini-projects spanning data ingestion, EDA, ML model building, and visual reporting with actionable business summaries.

EDUCATION

M.Sc. – Data Science & Artificial Intelligence | JSPM University, Pune

2024 – 2026

CGPA: 7.97

Bachelor of Computer Application (BCA) | SPPU University, Pune

2021 – 2024

CGPA: 7.67
